Change Healthcare Radiology Suite

Optum

A single-fee, all-inclusive, nonstop service to the cloud

When the cloud can't wait and your business can't blink

1. The problem

Moving to the cloud poses challenges. Hospitals and imaging centers are struggling to:

- Address today's security and scalability challenges while planning for tomorrow's needs.
- Reduce system complexity.
- Predict future prices in unpredictable times.

2. The solution: Simplify with SaaS

Our Radiology software-as-a-service (SaaS) packages provide a flexible journey to the cloud. Hospitals and imaging centers benefit from improved security, data center savings, predictable pricing, and the flexibility to grow and change with your needs.

Here's how it works

1. Begin your journey with on-prem and cloud solutions
2. Lock in prices at the beginning of the term to eliminate surprises throughout the journey.
3. Continue with upgrades to cloud-native solutions as new technologies become available.

Why Optum for imaging?

Accelerated cloud journey provides early ROI

Enterprise imaging platform; not just PACS

Follows third-party, industry standards and has evidence of HITRUST CSF validated assessment and SOC 2 II report

Predictable pricing

Easy connectivity

Start your journey today

Radiology SaaS packages address today's and tomorrow's needs in a single subscription

What's included

Software	Services and more
PACS beginning with on-premise and including a cloud upgrade	Small footprint server farm to manage your volume and make you resilient to network outages
Mammography for multimodality breast imaging	Compute, ingress and egress costs
Data optimizer to access data that already exists in the EHR	Implementation, VM build, upgrade, and migration services
Study sharing for training and conferencing	Organic growth
Intelligent workflow rules engine that consolidates interpretation and quality tasks	Support and customer success management
Archive with time to first image up to 14 times faster from the cloud than the local archive	
Viewer for remote access to images and data	
Analytics* to optimize quality, efficiency, and operations	
Image sharing* to eliminate CD burning
